

Concord Sportsmen's Club Monthly Newsletter

April 2022

PRESIDENT'S MESSAGE

Hello Concord members!

Last month was not a good month for a few of our board members, including me.

But we are back, and the weather is good. We are looking forward to having a great turnout at our monthly meeting (Monday April 18th).

We will have the Action Pistol Range open at 4:30 along with the Skeet Range. The Board meeting is 6:00-6:30, followed by pizza and beverages at 6:30. Please RSVP if you are going to attend so we can have a head count for food.

Looking forward to seeing everyone.

Mike McIntosh

GENERAL CLUB MEETING

There was no general meeting in March.

NRA-ILA California News

Senate Bill 906, requiring parental disclosure of firearm ownership and storage practices failed in the Senate Education Committee. However, the bill is not dead yet, as the bill was granted reconsideration for later in the session. Additionally, Assembly Bill 2156, banning 3D printing of parts and lowering the threshold for requiring a license for homebuilt firearms, passed the Assembly Public Safety Committee, and Assembly Bill 1769 was sent to the suspense file for consideration later in the session by the Assembly Appropriations Committee. Next week, two policy committees will hear three firearm and hunting-related bills as they continue along the legislative process.

UPCOMING EVENTS

Mon	Apr 11	6:00 PM	USI Monthly meeting
Mon	Apr 18	6:30 PM	Monthly Meeting
Sun	Apr 24	10AM to 1PM	Concord Club's Day at the Action Pistol Range

SR22® PISTOL PRODUCT SAFETY BULLETIN

Ruger has discovered that a small number of SR22® pistols may have right and left frame inserts that are not properly secured together. In rare circumstances, this condition may render certain internal safety mechanisms ineffective and the pistol has the potential to discharge upon decocking. Pistols that may be exhibiting this condition will intermittently exhibit a "slack" single-action trigger.

NOTE: A "slack" single-action trigger occurs if, while operating the pistol in single-action mode with a magazine inserted, the slide forward, and the manual safety disengaged, a trigger pull does not encounter resistance and the hammer does not fall.

Although only a very small number of pistols appear to be affected, Ruger is committed to safety and would like to examine all SR22 pistols that have ever exhibited a slack single-action trigger or discharged upon decocking.

Potentially affected pistols include any SR22 pistol with a serial number of 369-40078 or lower (including all SR22 pistols with a "SS" prefix). If your SR22 pistol has ever exhibited one of the conditions described above, you should immediately stop using your pistol and sign up for the Safety Retrofit as outlined in the Safety Bulletin. If you have never experienced either condition, your pistol is not affected by this Safety Bulletin.

Details about what to look for and how to sign up for the retrofit also appear on our website at Ruger.com/SR22Retrofit. The website also contains answers to Frequently Asked Questions, a video demonstrating the inspection process, and other information that you may find helpful.
